To Whom It Concerns:

8590 '99 JUL 27 P1:55

I am writing in reference to Docket #98N-1038,  
Irradiation in the Production, Processing + Handling of  
Food.

I grow increasingly alarmed at the processes  
taking place in the production of our country's  
food supply. Despite scientific studies + an increasing  
rate of all manners of cancers, diseases, + learning  
disabilities, we continue to bombard food with  
chemicals + radiation. There are more environmentally  
sound solutions.

If companies wish to do this, + believe it is safe,  
then LET THEM LABEL IT at least, + let people  
decide what they want to buy. It is criminally  
negligent to keep consumers uninformed in this  
manner.

Sincerely,

Michelle Collins
